

Weekly Report

2015/11/30-2015/12/06

1 Done

1.1 Project:

This week I mainly focus on searching and filtering functions.

The screenshot displays a web application interface with two main sections. The top section, titled '你可能要找的是:' (What you might be looking for:), contains a list of suggestions: 'www.baidu.com', 'www.baibai.com', and 'www.baibaihe.com'. Below this is a section titled '访问过www.baidu.com的IP' (IPs that have visited www.baidu.com), showing the IP address '61.14.158.23' with a count of '5' in a dark circle. The bottom section is a filter panel with tabs for '设备' (Device), '过滤器' (Filter), '数据' (Data), and '搜索结果' (Search Results). The '过滤器' tab is active. It includes dropdown menus for '国家' (Country) set to '中国', '省份' (Province) set to '香港', and '城市' (City) set to '---请选择---'. Below these is a dropdown for 'AS域' (AS Domain) with options '九龙', '新界', and '香港岛'. At the bottom, there are checkboxes for '设备' (Device) with options '可控设备' (Controllable Device) and '不可控设备' (Uncontrollable Device).

1.2 Blog

Writing the blog about the report from prof. Westermann.

1.3 Paper-reading

I read a paper about Poemage. The design process and the symbolism in this paper are very appealing to me. I believe they would give some inspiration to historical visualization projects.

2 To do

2.1 Project

Finish the first phase of global network visualization project.
